Saturday, March 10th, 9:00 - 11:00 AM. The challenge is to make risk management practical and usable. To effectively evaluate hazards, we first have to know what RIGHT looks like! This program is designed to help develop the skill-sets that allow us to detect deviations from the "norm" so that we can intercept and trap errors before they can lead to an accident. This seminar is provided **free**, and qualifies for ground training credit toward the FAA Pilot Proficiency Program. Please register at FAASafety.gov.

Refreshments will be provided.

Directions: Skyline Aeronautics Hangar

Message from the National Safety Program Manager:

**Safety is a learned behavior...Learn to be safer at the Learning Center found on
FAASafety.gov**
